

# Fireside Chat for Women Engineers

First Guest  
**Dr. Annette  
Böhmer**

Friday  
**Feb 11th, 2022  
07:00 PM  
at the FTM**

The Chair of Automotive Technology at TUM is proud to announce the start of a new **Fireside Chat for Women Engineers** series to be held throughout 2022.

Attendees will be able to meet and speak with successful, trailblazing women who have made a name for themselves in the field of engineering — both in the private sector and in academia. We want to discuss everything ranging from career choices, innovation, women in leadership roles and any other questions you may have.

Our series' first guest is **Dr.-Ing. Annette Böhmer**, a summa cum laude TUM graduate and current Team Lead at the BMW Group. TUM students may recognize Dr. Böhmer as founder of the hugely successful Think.Make.Start. course, which continues to be on offer at the university since 2015. Her efforts both at and outside TUM have made Dr. Böhmer a luminary among female engineers working in Germany!

If you would like to meet Dr. Böhmer, learn about her chosen career path, and ask her questions about how to succeed in the automotive industry, which to this day continues to be marked by a pronounced lack of female representation, please sign up for the event by scanning the QR code on the left.

Fireside chats are meant to be cosy, open and honest conversations, as if we were sitting around a fireplace. Be prepared to ask questions, listen, discuss, and extend your network. **There will be snacks!**
